1 Introduction to [The Company Long Name]

1.1 [The Company Long Name]

Our Headquarters in Montreal

For over 50 years, the ABC Manufacturing Company has been manufacturing xyz parts for the automotive industry in North America and Europe. We are proud that some of the biggest names in the automotive

industry are among our customers. This success has only been possible because of ABC's meticulous attention to quality and customer satisfaction, combined with the use of the latest technologies and rigorous in-house training.

Today our manufacturing facilities in Canada and France use the brand-new HH Laser to give us precision cuts otherwise not seen in our industry.

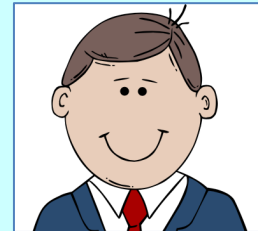

Our factory in Paris

ABC Manufacturing Company has also been a pioneer in the field of quality control and quality management. When we started our company in 1963 with a small machine shop in Montreal, Canada, we already put our own, sophisticated

quality control system in place to ensure that only perfect machine parts would reach our customers. Quite innovative for its time given that this was about 15 years before the very first version of ISO 9001 was published!

We have continuously improved our operations over the last 50 years and have long been implemented an ISO 9001 quality management system. We are currently certified to the latest version: ISO 9001:2015.

As President of ABC Manufacturing Company and as representative of our dedicated team of employees, I am honored to announce that this August 2016 we received the prestigious Platinum Quality Award from the president of the universe.
